Scan Me

Vegetation and permanent structures must be 10 feet away from the front door(s) and 4 feet from the sides and rear.

Keep Your Distance!

Transformers need to *be left alone.*

The green metal box that sits in your yard is an underground electric transformer. **It's an important piece of Horry Electric equipment to which our line crews need clear access 24-hours a day,** so please keep vegetation, fences and other obstructions well away from it. Also, because the transformer is connected to underground power lines, **you should never dig anywhere in your yard without first calling 811** to find out where the cables are buried.

And remember....

- ▶ **Never** let anything get closer than 10 feet from the front or 4 feet from the sides and rear of the transformer. The handle, lock and sticker are on the front.
- ▶ **Never** enclose the transformer with fencing, vegetation or anything else with less than a 10-foot-wide gate or opening.
- ▶ **Never** allow children to play near the transformer.
- ▶ **Never** pour waste oils, chemicals or other liquids on or near the transformer. These liquids can seep into the ground and damage underground cables.
- ▶ **If you need advice** on how to safely beautify the area around your transformer, call the Vegetation Management Department at (843) 369-2211.
