

Horry Electric Cooperative

A Touchstone Energy® Cooperative 

Meter Change-Out Project

Contractor crews will be working in your area.

Maintaining and updating electric equipment is a must. Horry Electric's goal is to continue providing safe, affordable and reliable electricity to you. When necessary, crews will make upgrades to equipment.

Horry Electric contractor crews are working to replace electric meters that are more than 20 years old. This is estimated to be a year-long project.

CONTRACTORS WILL

- have an Horry Electric picture ID badge.
- wear a safety vest.
- have magnets on both sides of their vehicles that read "Contractor for Horry Electric Cooperative, Inc. 369-2211. Ask for ID."
- knock on doors before they change the meter at the service location. **(Contractors will NOT knock before 8 a.m.)**
- will work on Saturday IF there is a rain day during the Monday - Friday work week.
- will end their workday at 4:30 p.m.

As a reminder, Horry Electric's Bylaws and Service Rules and Regulations state members have to grant the cooperative access to electric equipment. These rules and regulations are in place to keep everyone safe.
